No. 1877—Eighth Year. BUENOS AYRES, SUNDAY, MAY 3, 1868. Circulation 2500

MAUA BANK,
101-103 CALLE CANGALLO

The offices of this Bank having been removed to the above spacious building, in order to suit the increasing flow of business, the public is informed that the following transactions are carried on in cureney and specie in this Bank :—

First—Bills and obligations with good signatures are discounted on conventional terms.

Second—Money is advanced on mercantile and other securities approved of by the Manager.

Third—Accounts current are opened with Merchants or other parties who may prefer depositing endorsed and transferable securities, against which they may draw up to an amount previously convened under conditions established for such class of operations.

Fourth—Money is received in account current, bearing interest from day of deposit, which is accumulated in favor of the parties every three months, the depositors being allowed to retire at any time, by means of checques, part or the full amount at their wish, save when the quantity exceeds three hundred doubloons or one hundred thousand dollars currency, in which case forty-eight hours' previous notice is required to be given at the Treasury of the Bank.

Fifth—Bills or letters of credit are drawn and taken on Montevideo, Rosario, Sta Fé, Salto Oriental, Paysandu, Rio Janeiro, and other places in the Brazils, England and France, as also on other places, of which notice will be given hereafter.

Finally, the Bank undertakes and executes all legitimate transactions within the orbit of banking operations.

The establishment is always open from 9 a.m. till 3 p.m.

The Company insures against loss or Damage by Fire Private Dwelling-Houses, Goods Deposited in Specific Warehouses of Stone or Brick, &c., &c.; and also issues "Floating Policies," extending to the Custom-House and all or any of the Private and Bonded Stores.

The whole advantages which can possibly be contemplated by those desiring to effect Fire Insurances, may be resolved into the following:—

1st. Security.
2nd. Honor and liberality on the part of the Company, in whose hands they place their interest; and
3rd. The purchase of these advantages at a moderate rate.

It will be found that all these are presented by this Company to the Public in an eminent degree.

The Company's large Capital, under the immediate management of the Directors of this Establishment, affords perfect security to the Assured, while it may confidently assert, from the Constitution of the Board of Direction, from the character of its present Members, and from the qualifications which will be deemed indispensable in their successors, that the highest honor and liberality will ever characterize all its transactions.

It has been the object of the Directors, in their minor arrangements, to afford every possible facility to those effecting Assurances with the Alliance, and the undersigned hold a Power of Attorney enabling them to settle at once any Losses that may occur from Fire, Lightning, or Explosions of Gas in Buildings, on or in which this Company has granted Assurances.

THE PARAGUAYAN WAR.

The city is rife with varied rumors as to the real state of affairs in Paraguay and Rio. Army correspondents have been changed almost as often as commanders, and since the renowned Tourlouron has come to town to edit his newspaper and Sinbad has been obliged to leave owing to ill health, there is a feeling that we know very little of what transpires in the green room of the allied camp, but as is usual in such cases the great commercial interests at stake baffle all the efforts of the modern Benedecks; "news will out," no matter what sentries the Generals may put on pen, ink and paper, and every merchant in this city and Montevideo who has business transactions with Corrientes or Curupaity knows as well what is going on up there as the President in his back parlor in Calle San Martin, or the Emperor on his throne in Rio.

That the public of this city is not kept fully acquainted with everything that goes on in Paraguay there cannot be the slightest doubt, since private letters announce various movements which have never been put in print; but this is owing more to the incessant hubbub kept up here about local politics than any desire to hide such matters from the Hoe-press. Aside from this, commercial letters are only exhibited under a strict reserve, and it is difficult therefore at a distance of so many hundred leagues to get at the truth, and the whole truth.

During the long continuance of this protracted war we have as far as possible adapted the line of a distinguished historian in giving both sides to our readers; whenever we received Paraguayan papers we have filled our columns with extracts, now however we get few of these, and only from the casual fellow countryman who comes down from the fleet or army can we gather an inkling of what is going on both sider of the Tebicuari.

Although it is generally supposed that the allied army is resting inactive before the mud trenches of Humaitá, and the enemy reduced to the very last stage of exhaustion, both suppositions are incorrect; there has been fighting, and very stiff fighting going on within the last ten days, and whatever advantages the Brazilians may have obtained it has cost them dearly, both in men, horses and officers. Caxias anxious to cut off the Humaitá garrison from all communication with the interior of Paraguay is preparing to land a strong force at a place called the Timbo, in the Gran Chaco, which is held by the Paraguayans, and must be taken by storm. Lower down the river various Brazilian picquets have crossed over to the Chaco, but they have always found the enemy in strength, and never could keep a foothold. To the north of the Establecimiento a very bloody surprize fight took place last week between a Brazilian cavalry division and a picquet of Paraguayans, who fought to the last, dying sword in hand—only two of the Paraguayans escaped, but it cost the Brazilians dearly also. The Brazilians in this fight lost three officers, one of whom was a colonel of distinction. The position was held by the Brazilians throughout the day, and then evacuated, whereupon it was at once reoccupied by a detachment of Paraguayans sent there by orders of Barrios to hold the place. In the allied camp there was great noise made about this desperate fight, and Osorio received felicitations from all quarters; but in reality it was so small an affair that it is not worthy of the name of a battle.

The small garrison which defends Humaita shows no disposition to remain quiet. On one day, when nothing was anticipated, the guns which command the south-east kept up a tremendous fire for several hours on the allied lines, and each morning before break of day the allied outposts have to be on the alert, owing to the ceaseless activity of the enemy. A stray horse, mare, or bullock is at once captured by the Paraguayans. The river is falling, and the chain across must now be cut; close alongside there are a number of canoes, which it is supposed were brought over land by a road which the Brazilians, it is said, have found out; this road strikes out back on the high grounds in the Chaco; but in the woods which cover the low ground the Brazilians hope to cut a pass which will intercept the Paraguayan communications.

Respecting the movements on the other side of the Tebicuari, very little is really known, but some particulars from a Paraguayan boy caught near Pilar, it is said, the commander-in-chief has obtained. Only the other day a force of about fifty Paraguayans was discovered in the vicinity of Pilar, but they vanished. There seems to be no doubt, however, that since Lopez has led the remnant of his once powerful army from Humaita, and the Paraguans find themselves quartered in the lovely mandioca fields of their native country. They have imbibed new courage, and, from all accounts at hand, Lopez is filling up his ranks by hardy recruits arriving daily from the North. The enemy's cavalry is also better mounted, and the men look stronger and healthier. It is idle, and worse than idle, to conceal the fact that the prospects of a prompt termidation of the war by arms are more remote than ever, and the ultimate sequel of this eventful campaign will be mediation or intervention.

As regards the statement that the Emperor has given Caxias sixty days to conquer or retire. It is perfectly immaterial, although in high diplomatic circles the matter is talked of.

IMPORTANT FROM MONTEVIDEO.

PAPER-DOLLAR EXCITEMENT.

THE TRIBUNA ARTICLE.

ITALIAN IMMIGRATION.

DR. VIOLA'S ARREST.

THE BOLIVIAN MINISTER.

Nothing for years has created such excitement in this city as the article in the Buenos Ayres *Tribuna* on the forced currency question. In every circle of society, at the clubs and cafés, even at the Italian boarding-houses and the marine stores, the article in question was read and re-read, not by hundreds but by thousands; it struck so home, and so directly to the question, that for a while not a white man in this blessed city was to be found with courage sufficient to defend the forced currency, and all the power and all the influence of the banks was impotent to turn the tide of public opinion. The article in question fell like a thunderbolt on us all, and came most apropos on the very morning of the day on which the Senators were to discuss the forced currency bill. No matter what may be said of the venality of the times, no matter what may be urged touching the elasticity of principle of Oriental politicians, moral degradation has not reached that pitch when the voice of public opinion on behalf of honor and principle passes unheard. Verily, it would seem as if the photograph of Rufino Varela, with a depreciated Montevidean dollar in his hand, was hung up in the Senate Chamber, or that every member of the House had a copy of the *Tribuna* in his pocket, for none had courage to propose the bill continuing the forced currency, and which Mr. Varela proved would secure a monthly loss to the country of $2,700,000 pats. It is really amusing to remark the versatile character of the public. The day before the *Tribuna* came down here with this thundering philippic, the whole of the local trade, the working classes and operatives, were steady in their support of the banks and the paper money, but in less than twenty-four hours even the very costermongers in the market changed round in their opinions, and no matter what may be said to the contrary it is an undeniable fact that what before was a mere topic of discussion has now risen to be a subject of alarm. Whether for better or worse I do not take on me to say, but the great newspaper of Buenos Ayres has created such a revolution in public opinion that the most intense odium is thrown upon all who are supposed to favor the non-payment of specie.

The continued arrival of Italian emigrants is attracting great attention, and efforts are being made to push the new hands out to the camp, where peons are said to be very scarce. Over one thousand Lombards have arrived here within the last few days; the streets are crowded with Italians looking for employment, and if report be true, some ten thousand are expected out here before spring. Already wages in the quintas, have declined to eight and ten dollars per month, and many are of opinion that the wheat crop of this country will become of increased importance, owing to the cheapness of labor and the virgin fertility of the soil Almost every hill-top around this city is crowned with a windmill; immense slopes of newly-ploughed land are to be seen on all sides, and the tillage which meets the eye from Union to Las Piedras is a consoling evidence of the onward march of the plough.

A great debate has sprung up here touching the legality of Dr. Navarro Viola's arrest; and the *Siglo*, with praiseworthy independence, attacks the conduct of the Chief of Police. The question has resolved itself into a legal discussion, regarding which the public has no greater interest at stake than to know that, according to the law of the land, the policeman who enters a man's back parlour is a trespasser and can be treated as such. I don't think you can say so much as this in Buenos Ayres, for the police authority there is extremely arbitrary.

There is a very keen watch kept on the movements of certain parties in Entre Rios, owing to the constant rumors afloat; but the Government has received the most solemn assurances from Entre Riano authorities that there is nothing in it. Colonel Carravalho has arrived here from Entre Rios. He intends to remain in town, and is looking for a house.

The new Bolivian Minister for Brazil and the River Plate Republics, Colonel Quevedo, has also arrived He will be presented to the Government in a few days, and then will proceed to Buenos Ayres.

Business continues very brisk here, particularly in the almacen line. Montevideo may be said to feed the allied army. The last few days the chief articles exported to Curupaiti have been hams and bacon, but every day we are shipping up to the army luxuries for the rich, and freights for Curupaity are rising.

The young pianist Vasconcellos has made his 'debut' in the San Felipe Theatre with very great success. Every one praises him. He will proceed from this to your city.

On next Sunday there will be an exciting tilbury race from the 'arroyo seco' to the Paso Molino. As the road is 'macadamised,' there will be no breakneck risks, such as I witnessed about a year ago on your splendid carriage drive out to Belgrano. Verily, the people of Buenos Ayres have reason to be ashamed of that detestable road. You have got a fine suburb in Belgrano, but you cannot make a decent road to it; so much the better, of course, for the railway, but so much the more disgraceful for the River Plate Athenians. We are fifty years ahead of you in roads and bridges, and if we have stumbled into this forced currency blunder, we know full well who to thank for setting us the example.

THE THREATENED REMOVAL OF THE PROTESTANT CEMETERY.

MEETING AT THE SCOTCH CHAPEL.

Yesterday, the meeting convened by the General Committee charged with the management of the Protestant Cemetery, met in the School-room of the Scotch Church.

Mr. Plowes having been called to the chair, stated that the object of the meeting was to take into consideration an official notice received by the Committee of the Protestant Cemetery, from the President of the Municipality, containing a summary order to close said cemetery within six months, which he proceeded to read, as follows:—

"Buenos Ayres, April 28, 1868.

"To the Members of the Committee charged with the Protestant Cemetery.

"Motives of convenience, both hygienic and material, with regard to the city, as shown by competent persons, have decided the Municipality to order peremptorily the closing up of the Protestant Cemetery within six months. This term, to be counted from the date of the present, has appearsd to this Board sufficient to enable the Committee to obtain and prepare a piece of ground in which, with the Board's previous consent, can be erected the new cemetery that is to replace the one whose closing is hereby ordered.

"By desire of the Board, and for its due compliance, I have the honor to inform the members of the Committee of the above resolution.

"God preserve the Members of the Committee.

"CAYETANO M. CAZON, President;
"B. LLORENTE, Secretary."

Mr. Plowes then having laid before the meeting the title-deeds of the property which was purchased by Mr. J. Harratt in the year 1832 and by a legalised deed of transfer, made over by him in perpetuity to the British community resident here, for the express object of making it a burial-ground, stated that in his opinion the Municipality were not justified either in law or in equity to take the step they had resolved upon.

After a desultory conversation, the following resolution, proposed by Mr. Craufurd, and seconded by Mr. Black, was unanimously passed. "That the three following gentlemen, as representatives of the three nationalities present, viz.:—Mr. Jacobs, Mr. Buttner, and Mr. Plowes, be requested to wait upon the British Consul to take his opinion on the subject, and show the titles we possess as British subjects, which are duly registered in the British Consulate ever since the year 1834."

The meeting thereupon was adjourned, 'sine die,' and the above-named gentlemen proceeded at once to fulfill the mission entrusted to them.

EDITOR'S TABLE.

Yesterday we received our mails from Montevideo. It appears that the "Tribuna's" article on the specie question has caused a tremendous row, which has extended even to the quinteros and working classes. Our correspondent gives a graphic description of the affair.

Important advices from Entre Rios were looked for yesterday, as at one o'clock on Friday General Urquiza took the oaths of Governor, and some parties expect that he will prouounce in favour of Dr. Elizalde as future President. In Montevideo it is confidently stated that Dr. Elizalde will be the next President, and that General Urquiza has so expressed himself to many parties who have been to San José. Here in Buenos Ayres, where almost the whole Press is ranked against Dr. Elizalde, few are aware of the real chances which are in his favour; but in Montevideo, where from a distance they watch the current of affairs, the prevailing opinion is that Dr. Elizalde has secured the support of the whole Urquiza party, and that he will carry the Presidential election by a sweeping majority. Nobody down there thinks Sarmiento has the remotest chance.

Passengers come down the river yesterday morning say that on passing Concepcion in the afternoon, the steamer having been delayed by a fog, great rejoicings were going on there on the occasion of the official reception of General Urquiza as Governor of the Province. The gay sounds of music were watted across the water and innumerable rockets rent the air with their detonations. Of course nothing was known yet as to the anticipated official declaration of the General with regard to the Presidential election. A great ball in the evening was to crown the day's festivities.

We call attention to a practice sanctioned by custom in the commercial world, which we opine should be reformed. Whenever a meeting of creditors is called, the debtor is allowed the assistance of a lawyer, who generally avails himself of his technical knowledge to impose unjust conditions. A case of this kind happened two nights ago, when on the question whether a dividend of 80 or 90 per cent. should be declared, the lawyer who was present for the debtor attempted to browbeat the creditors, but these began to cough him down, and by a well sustained and general performance with the ends of their canes on the floor, known by the name of the "Devil's Tattoo," they succeeded in making him beat a prudent and precipitate retreat.

Yesterday we received several visits from our country friends; we are pleased to say that the accounts we received from them of the general state of affairs outside fully bears out our statement, that we have pulled through the worst. Sheep are still selling very cheap; we hear of some sales at 15 and 18 al corte; and even small ram-breeding flocks have been sold at a great sacrifice. Now is the time for intending sheepfarmers to purchase.

The *Mercantil del Plata* of Montevideo publishes in English some doggerel verses about the unfortunate paper money and forced currency. The metre is too long and irregular for our columns. Some of the verses are well put together. It is, of course, anonymous, although with our experience and knowing ever one in the place who can write five lines either in prose or poetry, we find no difficulty in recognising the "flavor of poor dog Tray."

We return our best thanks to our big colleague the *Tribuna* for its cordial greeting to the *Standard* on the occasion of our anniversary. We salute the *Nacional* on its birthday, and congratulate our colleague that it boasts of the same natal day as ourselves. The *Nacional* is a well edited paper, always full of news, and consequently well supported. To the *Republica* and *Courrier del Plata* we also tender our thanks for their good wishes in our behalf.

The last number of the *Brazil and River Plate Mail* contains an article refuting the assertions of Sr. Lastarria as to the feeling in England towards "these Republics." As this is a subject that has lately occasioned much controversy, we intend to reproduce it in our next issue. Mr. Hadfield, the proprietor of the above interesting periodical, as we have already announced, is sojourning now among us. He went over yesterday to Colonia on a visit to our friend Mr. W. White, at the Estanzuela Estancia, where he will no doubt receive a very favorable idea of camp life, under the hospitable and comfortable roof of so excellent a host.

At the request of Sr. Sarmiento, a Madrid publisher and bookseller, Sr. Rivadeneira, has made a present to the San Juan Library of 513 volumes. The greater portion of the works are classical and didactic, some very old, and others recently published in Spain. With such a valuable addition, the recently-started library in the City of San Juan may hope to rank ere long among the best in the Republic. Our colleague the *Republica* truly remarks that acquisitions like this are worth more than a battle gained, and Sr. Sarmiento's indefatigable efforts to promote at all times the intellectual and material interests of his mother country are equally creditable to his head as well as to his heart—and yet he is gravely called "el loco."

On Monday night the Philharmonic Society will hold their usual meeting at 7.30 p.m. at the Coliseum, which we hereby notify to the members.

Respecting the correspondence of "F. F." in our edition of yesterday, we are able to inform our readers that he has built a large house and formed splendid alfafares and quinta, which are in the most thriving condition. We are requested to state that land may be obtained at a low rental within a league and a half of Los Leones station, and two leagues from that of "F. F."

We notice with lively satisfaction the daily increasing traffic with Rosario, which port, in spite of revolutions and political disturbances, is steadily progressing and daily increasing in importance. On the days the steamers leave the Tigre for Rosario it is wonderful to see the number of passengers that crowd the cars of the Northern Railway. We understand that not less than two thousand passengers, on an average, avail themselves of this route every month. The accounts of the Central Argentine Railway are very flourishing, and the goods traffic between Rosario and Villa Nueva has so much increased lately that it is supposed there will be a very small balance due, if any, on account of the guarantee.

Several Senators and Deputies to Congress have arrived during the past week from the Provinces, and a notice by the Secretary of the Senate officially informs the members of that august body that there are a sufficient number in town to make a quorum, and summons them to meet for the purpose of holding their preparatory sittings.

We take the following notice from our colleague the *Tribuna*, with regard to the Juries of the Contribucion Directa:—"On and after next Monday, 4th inst., the Juries of Appeal will meet to hear complaints relative to valuations made in the Parishes of the Catedral al Sur, San Miguel, San Nicolas, San Telmo, Piedad, Socorro, and Pilar, from 2 p.m. to 5 p.m., at 367 Calle Rivadavia."

The Aeronaut Mr. Baraille has been hard at work with a large staff of young ladies, each with a sewing machine, getting ready the new balloon in which he is to make his ascensions during the May feasts. The cost of the balloon has been defrayed by subscription, to which the Municipality we understand has contributed 30,000 dollars. One of our morning contemporaries states that the gas alone to fill the balloon will cost 15,000 dollars, but we think one zero may safely be eliminated from this figure.

INTERVENTION OF ENGLAND AND FRANCE DEMANDED BY BRAZIL.

In the *Cologne Gazette* we read that Brazil is weary of the cost of the war in Paraguay, and sees no speedy termination to the struggle. The diplomatic agents of Brazil in London and Paris have simultaneously taken steps towards inviting a mediation. Telegraphic despatches have in consequence passed on the subject between the two Governments. "We do not know," says the *Cologne Gazette*, "what may be the ideas of the English Government, but we think we can report the answer of the French Minister of Foreign Affairs, M. de Moustier. He desired, in the first instance, to wait until the Washington Cabinet had been consulted, so that the three Governments of France, England, and the United States could act in accord on that important question."—*Deutsche Zeitung.*

It is understood that the news published by the *Cologne Gazette*, was sent from the Prussian Legation in Paris.

CHILE.

Agriculture is progressing in Chile. More than 100 threshing machines have been ordered from England and the U. States. One house alone has received orders for the following:—26 North American threshing machines, 17 English do., 14 hand engines, 19 steam engines.

The decay of the mining interest has induced people to turn their attention to agriculture. The price of copper is no longer the criterion of commercial prosperity; and all that is wanted is the application to agriculture of the surplus labor in the mines.

In Magallanes a rich iron mine has been discovered.

The engineer D. Vicente Sotomayor has completed his survey of the lakes Encañado and Negra, with the object of conveying water to Santiago. It is found that there are parts of the latter lake 290 metres in depth. The scheme is considered praticable, but more costly than was at first imagined.

Chile is still alarmed by the presence of cholera in Mendoza and, has placed guards in the passes of the Andes.

The following is a list of cannon in the fortifications of Valparaiso:—5 Blackeleys, 450; 5 do., 250; 5 Rodmaw, 600; 1 Armstrong, 300; 5 do., 150; 2 Parrott, 300; 11 do., 300; 8 do., 100; 3 do., 60; 17 brass, &c. &c. making a total of 128 guns, with a reserve of 48 which can be immediately put in service.

The barque Zingara had arrived from Buenos Ayres. The Emma had sailed for Montevideo.

SHEEPFARMING.

The value of Land, and Sheepfarming as a serious business. The way to make it pay.

(*Continued from May 2.*)

Take the basis of a full half league of good land, commonly situated, on which it is proposed to start with a stock of breeding ewes for five puestos, 800 to 1,000 each, say 1,000 for round numbers. To this end there would have to be purchased 5,000 picked ewes, or points of sheep to the number of 10,000 or 12,000, which would cost, say, $15 to $20 each, and from which there could be picked the required number (5,000) of ewes and big borregas, between the ages of fifteen month and four years, the remainder, run on good camps for a few months, would, in the vat, yield back their cost, or nearly so, say that the 5,000 picked ewes stand in $20 each, to which add $1¼ for dipping two or three times, so as radically to cure them of the scab, a step of primary necessity, before putting them on to the ground, which should have been kept free of stock, and especially of scabby sheep, for six or eight weeks before moving on to it. Of course, sheep should be selected before rams were put to them, or otherwise sell all the lambs, 'machos ó hembras,' for the market, for, let it be understood, the object of the sheepfarmer should be to breed improved stock.

As there would be a difficulty in getting the whole of the ewes without being in lamb, we will assume that the majority are in lamb, purchased at the beginning of the year.

January 1870—And that they stand on the ground and perfectly cured of scab, $22 each—$110,000. If the sheepfarmer knows his own interest, he will put to these ewes in the coming spring really good rams, weighty in carcase and fleece. Such rams are not easily obtained in any number, and it is hardly to be supposed he could obtain suitable ones under an average of $1500, say eighty rams, $120,000—$230,000.

Assuming that a majority of the ewes are in lamb, he will have for the market between June and August, 1870, 2,500 lambs, at $15 each, 35,500. Male and female; of course, he would not keep any of these underbred lambs. November, 1870—He will shear 5000 ewes, which, if they have been early and well cured of the scab, and being all young, picked ewes, they should run 6 to the ar., say 800 ar. $70, $56,000; 80 rams, average 12 lbs. each, $40, $2,800—$94,300.

In the month of October, 1870, the sheepfarmer will put his own prime rams to his 5000 picked ewes and borregas, from which he may (under the system indicated) fairly calculate on 80 or 90 per cent. of lambs. There can be no question of this result if the rams are vigorous and well-fed, and the ewes in suitable conditon, which they will be if the estanciero knows his business; therefore, before the end of May he will have at the rate of 80 per cent. 4000 healthy lambs, having made allowance for some losses.

2000 ewe lambs, 2000 tup lambs—An estanciero with half a league of land will find it more convenient to sell his tup lambs than to keep them for capones, as he can thereby make more puestos of breeding ewes. Therefore, in and before—

August, 1871—He will have realised 2000 male lambs, at from $15 to $20; we will take the lower figure, $30,000. November, 1871—There will be shorn 5000 ewes and 80 rams: 840 ar. at $70, $58,880—$88,800.

At the end of August there will have been weaned 2000 ewe lambs, which will in October be formed into two flocks, occupying two additional puestos, and which will be shorn or otherwise as thought best. We will assume they are not shorn as lambs. In October, the rams will have been again put to the 5000 ewes.

August, 1872—On the same calculation as above 2000 male lambs at $15—$30,000.

In October there will be 2000 weaned ewe lambs, for two puestos, one additional one (making eight), and one to replace the puesto of the oldest of the 5000 original ewes, which should be in prime condition in that month, or in November, for slaughter, and they will yield their original cost from their grease and full woolled skins.

November, 1872—1000 ewes realised for slaughter, $22,000; these 1000 ewes of course are not shorn, therefore they will be shorn: 4000 of the original ewes, 666 ar., at $70, $46,600; rams, 40 ar., at $70, $2800; 2000 borregas, 16 to 17 month's wool, 3 to an ar., 666 ar., at $80, $53,200—$154,600.

(The rams of the 1000 ewes slaughtered will be disposed of, and additional and superior rams required for the 2000 borregas).

The annual temperature of Montevideo is stated by Berghaus at 63 deg. F., that of Buenos Ayres by Dove at 68.83 deg. F. According to the same authorities the mean summer temperature in Montevideo is 77.3, winter, 57; in Buenos Ayres, summer 73.2, winter 52.6, showing the former place to be much the hotter.[?]

No similar statements of other places in South America are known to exist. Great ignorance, therefore, prevails on the matter of climate of South America. Before leaving Europe, for reasons of health, the matter of climate was one of the highest importance to me, but I was unable to ascertain anything beyond what I have stated above. My information from private individuals, even those who had lived out here or

in Brazil, was most contradictory, so that I was at last misguided, and lost three valuable months in Rio. Montevideo realises all my expectations, and I hope that from further experience I may be able to recommend it as a residence to some other invalid friends at home.

VISIT OF THE PRINCE OF WALES

The following we believe are the arrangements for the reception and entertainment of his Royal Highness the Prince of Wales during his visit. In a few days the Lord Lieutenant, the Marchioness of Abercorn, family and suite will leave town for their northern residence, Baronscourt, for the purpose of enabling the staff of the Board of Works, under the direction of Mr. Owen, architect to that department, to commence the necessary decorations and refurnishing of the state apartments for the reception of his Royal Highness and suite. The Chief Secretary's Lodge, Phœnix Park, will also be decorated and refurnished for the reception of his Royal Highness the Duke of Cambridge who will make his sojourn there. The Board of Works has also received orders to place themselves in communication with the Dean of the Chapel Royal and Sir Bernard Burke, Ulster, King at Arms who will give the necessary directions for the preparations to be made in the Cathedral for the grand installation ceremony of the Prince as a Knight of St. Patrick.

The Prince is expected to arrive on the evening of Easter Tuesday, the 14th of April. His Royal Highness will not travel in state, but at Holyhead a guard of honour of the Anglesey Volunteers will parade on the platform and line the way towards the steamer.

The officers of state, the Commander of the Forces in Ireland and the municipal authorities of Kingston will take their place on the Carlisle Pier and await the landing of the Prince. As soon as the steamer is brought to her moorings, the Comptroller of the Lord Lieutenant's household, with the Gentlemen Ushers, will go on board, and the various public functionaries will be introduced to their Royal Highnesses the Prince of Wales and the Duke of Cambridge. The royal party will then proceed to Dublin in the royal saloon carriage

MUSIC versus MARRIAGE.

French and English and German journals are making a great deal of fun over the young and romantic King of Bavaria, for breaking off his nuptial engagement with the Princess Sophia, as he discovered that his betrothed did not reciprocate his passion for music and especially for Wagner's 'music of the future.' The beautiful Princess is almost broken-hearted over her misfortune; but still she has found that with all her efforts she cannot bring herself to an admiration for Wagner; and as the point is one upon which King Louis II. is immovable, she has nothing before her but despair and the misery of an old maid. We hold, however, that the King is perfectly right. For, suppose he had got himself married to the Princess Sophia, and had then found out that she had no possibility of sympathy or interest in that which constituted the chief thought and passions and devotion of his existence, what an awful life would have been his—and hers. Neither able to play Wagner's music herself, nor to listen to Wagner when he played his own music, nor to enjoy her husband's attempts at Wagnerizing, she would have been compelled to sit alone all day counting her fingers and toes, and wishing she were a maid again. The case was one of "incompatability of temper," which has always been considered conclusive ground against marriage—or, what the French call "incompatibility of humor," which, in at least one of the countries of Europe, is accounted sufficient cause for divorce. The King has saved himself and his ex-affianced a world of trouble by being able to force what his marriage would lead to, and breaking off the engagement in time.

GOTTSCHALK'S SISTERS.

The Misses Gottschalk's Matinée Musicale came off last Monday at the Beethoven Rooms, and was in every respect a success. These artists are by degrees gaining ground with the musical public, and fully deserve to rank amongst our first-class talent. The programme was selected with great taste. Amongst the several successes of the morning special mention must be made of Miss Blanche Gottschalk's singing of the Valse from 'Romeo et Juliette,' which was encored, as was also a Barcarola by Ricci, sung with great feeling by Mr. J. Cecil. Two pianoforte duets by the well-known L. M. Gottschalk, one on 'Trovatore' and the other 'Di que Si,' were received with immense applause. Miss Clara Gottschalk performed a composition of her own called "Souvenir de la Louisiane," and received also for it an unanimous encore, decidedly the most deserved one of the matinée. Altogether the matinée went off brilliantly and with great 'éclat.'—*Orchestra.*

THE LANGUAGE OF THE FANDS.

The other day I was sitting near one of the greatest men in England (perhaps it was in the House of Commons, but I shall not tell you exactly where) and he was secretly suffering from suppressed anger, and was being bullied from all directions. The man maintained his part admirably. He was calm and equable in reply; when he sat down he put on an air of repose; he kept himself still, he governed his eyes, he governed that difficult organ to govern, the mouth; but his hands quivered with the emotion felt, and the veins stood out upon them in stern relief. He little imagined he betrayed to me all that he felt by those hands.

HOW LONDON IS FED.

Modern London (says Mr. Smiles) is mainly fed by steam. The express meat train, which runs nightly from Aberdeen to London, drawn by two engines, and makes the journey in twenty-four hours, is but a single illustration of the rapid and certain method by which modern London is fed. The North Highlands of Scotland have thus, by means of railways, become grazing-grounds for the metropolis. Express fish trains from Dunbar and Eyemouth (Smeaton's harbors), augmented by fish trucks from Cullercoats and Tynemouth on the Northumberland coast, and from Redcar, Whitby, and Scarborough on the Yorkshire coast, also arrive in London every morning. And what with steam-vessels bearing cattle and meat and fish arriving by sea, and canal boats laden with potatoes from inland, and railway vans laden with butter and milk drawn from a wide circuit of the country, and road vans piled high with vegetables within easy drive of Covent-garden, the great mouth is thus from day to day regularly, satisfactorily, and expeditiously filled.

BEHIND THE SCENES AT A BULL-FIGHT.

To judge fairly of those horrid amusements (writes Mr. Edwards) you should go behind the scenes. There in a dreary chapel you see the matadéros and bandrilleros, and all the other wretched actors in the play taken by turns to confess and receive absolution at the hands of a priest. How ghastly pale and craven they look in their tinselly dresses!—more like culprits going to execution than the proud heroes of great feats. Adjoining the chapel is a room fitted up as a hospital, which is so often called into requisition, and from this you are led to the stables, where stand wretched hacks soon to be blindfolded and tortured to death.

ON MASTICATION.

The custom [says a physician] of not masticating the food completely is a very common cause of dyspepsia. Before the stomach can act properly on food mastication is neccessary to break the cohesion of the organic matter, in order to aid its solution in the stomach. It extends the surface of the substance to be acted upon by the juices of the stomach in the same manner as pulvorisation aids the actiou of chemical solvents upon common matter. There is also, probably, some influence ot the saliva, which mastication miugles with the food, in aiding the solution of solid matters in the stomach, although this is undetermined. At all events mastication, mechanically considered, assists digestion; and nothing is more likely to act as an injurious irritant to the alimentary canal than unmasticated food.

MONEY-GETTING.

But it may be here said 'Spending is easy, Mr. Preacher; tell us how to get money.' Well, that is easy enough too. If you really have your heart, or what you call your heart, resolutely fixed on money-getting, I know nothing easier; for that master passion destroys all other passions—as well as the virtues. He who craves for money for money's sake will stint and spare screw, and think nothing of the inconveniences to which he submits himself; he has no other temptations who studies to be a rich man; the attention of his mind is never taken off by such trivial matters as friendship, pity, love, or the pleasures of literatnre or learning; so that sooner or later, he is perfectly certain to succeed, and always does so. I have never known a single exception. Whether the golden fruit thus obtained is not found to be filled with the ashes after all, is quite another matter.

AN ARISTOCRATIC PERFUME

Bulwer Lytton, the great English romancist, says that a gentleman is known by the perfume he uses. There is a delicacy, an insinuating and luxurious softness in the aroma of MURRAY and LANMAN,S FLORIDA WATER, which is delightful to persons of taste and refinement. Hence it is acceptable to the true gentleman as to the lady of fine sensibilities. More than this: every gentleman knows or should know, that when sufficiently diluted with water it is a wonderful emollient—the best that can possibly be used after shaving. Its refreshing odor is an exquisite contrast to the sickly taint of the heavy French extracts. ☞Purchasers are requested to see that the words "FLORIDA WATER, MURRAY and LANMAN, No. 69 Water street, New York, are stamped in the glass on each bottle. Without this none is genuine.

ON 'CHANGE.

May 2, 1868.

Ounces,	$400
Sovereigns,	122½
Patacons,	25
Bonds,	44¼

National Bonds ruled very firm to-day, and closed with an upward tendency—the opening price, 44¼, was for a while barely sustained, as Bonds were offering very freely, and some 14,000 sold at 44¼, but in the afternoon the market grew stiffer, and 30,000 were sold at 44¼. The sales on time were heavy, and show the confidence speculators have in prices rising 130,000, at 44⅞, and for June 30th, 72,000, at 45¾; but the rates for cash are so much under the prices for long dates that it is evident money is still required by the Bulls. Outsiders, however, are again entering the Bond Market—the price as an investment is tempting, whilst as a speculation it is thought to leave a fair margin. Of course the price of Bonds for next month greatly depends on the Montevidean market, in case of the resumption of specie payments. Very heavy amounts in specie will have to be remitted from this market, which will at once bring down prices, but, on the other hand, should the specie payment be postponed, Bonds must necessarily jump up, owing to the winter season being now upon us.

Political influences have very slight effect on Bonds now. Few believe that any political troubles can permanently disturb the present state of things in this Republic, and the price of Bonds may be said to solely depend upon the demand or supply of money.

Collections through town are represented as good, and the week's trade in produce very active.

Exchange has a declining tendency. The rate is quoted at 49¾ and 50d. It is thought that the low rate of exchange will give an additional impetus to exports.

Business of some importance to the financial world will be discussed in the ensuing week, by the Directors of the Provincial Bank, which possibly may lead to increased ease in the money market.

MINERVA COLLEGE.
MADAME FARNESI
Has the honor to inform Parents and Guardians that she has now Opened the above College for Young Ladies upon the plan of the first European Colleges, and has spared neither trouble or expense to have ever efficient French and English Governesses, and hopes, with the aid of Masters, to give such a finished education as to do away with the necessity of sending young Ladies to Europe.
Madame FARNESI takes this opportunity to thank her Friends for the kindness and patronage they have shown her, and for the satisfaction they have expressed for her past efforts, she begs to assure them that nothing will be spared in the future to render the education perfect in every respect.
The House is large and airy, with Bathrooms and every comfort and convenience. A Doctor visits the College once a week. Prayers are held daily in separate rooms for the Protestant and Catholic Children, and a minister of each religion visits the College once a week for examination.
The Course of Instruction comprises French, English, and Spanish in all their branches; Geography, Grammar, Sacred and General History; Composition, Literature, Writing, and Arithmetic; Plain and Fancy Work of all kinds.
The Rules are strict, but every kindness and attention is shown the Pupils.
Every Six Months there is a Public Examination, that Parents may judge of the progress made and the course of studies pursued.
The first Saturday in the Month is a Holiday; and it is earnestly requested that, when possible, Friends will only visit the Pupils on that day or Sunday, to prevent the studies being interrupted.
The only Language allowed to be spoken is French. The greatest attention is paid to their manners and deportment, that they may not only be well-educated, but have the refined and elegant manners of a Lady; and that, if necessary, on leaving the College, they may be able to take their place at the head of the house.
The Elder Pupils who desire it are taught Dressmaking and Housekeeping, without extra charge, a Governess being kept for that purpose.
The Young Ladies are never left alone Night or Day, a Governess sleeping in each Room.
EXTRAS.
German, Italian, Music, Singing, Drawing, and Dancing.

CONSUMPTION,
Chest Affections, Chronic Cough, General Debility, and Loss of Nervous Power.
DR. CHURCHILL'S
HYPOPHOSPHITES.
The following are the preparations used by most eminent members of the Medical Profession, in every country in the world, for the cure of the above complaints:—
Syrup of Hypophosphite of Soda,
Syrup of Hypophosphite of Lime,
Pills of Hypophosphite of Quinine,
and in cases where ferruginous preparations are required (chlorosis, anæmia, etc.,) the
Syrup of Hypophosphite of Iron,
Pills of Hypophosphite of Magnese.
These valuable medicines have saved the lives of many consumptive patients. Even in the third stage their beneficial effects have been manifested frequently. In every instance, however far advanced in the disease, the patient will find a marked improvement, both in local and general symptoms. There will be observed a remarkable increase of nervous power, a better appetite, greater regularity of the bowels, better digestion, less cough, less expectoration, less susceptibility of catching cold, less perspiration at night, etc.
Dr. Churchill's Hypophosphites are sold, with directions for use, at four francs per bottle, in France, by Swann, Pharmacien, 12, Rue Castiglione, Paris.

SAVINGS BANK.

BANK MAUA AND CO.
101--Cangallo--103.
BUENOS AYRES.

The immense advantages of Accounts Current are now so generally felt and appreciated in the two great emporiums of the River Plate, Montevideo and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.
The Bank of Mauá & Co. in Montevideo has already provided for the working classes in that city a safe and profitable depositary for their savings.
The sums deposited in that very important institution are daily increasing, and already reach a very large amount.
These advantages have not hitherto been enjoyed in this city by an immense number of clerks, artisans, working men, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, sickness, or old age, instead of spending them in the immoral gambling, in lotteries, and other frivolities.
The Bank of Mauá & Co. of this city, following the noble example of their firm in Montevideo, now offer the same facilities in this city, and has opened a Savings Bank at No. 103 Calle Cangallo from Nine a.m. till Three p.m. every day, for the reception of the savings of the classes already mentioned, Sundays and holidays excepted.
The Bank will deliver to each depositor a pass book, in which will be entered the amount deposited and withdrawn.
The depositor is permitted at any time to withdraw the whole or part of the sum deposited; in the former case the interest will be calculated up to date.
The Bank of Mauá & Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.
The Bank of Mauá & Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighborhood.
Buenos Ayres, 2nd January, 1867.
P.P. MAUA & Co.,
M. A. DE FREITAS AMORIM.

CONDITIONS.

First—The Bank receives at interest any sum from Twenty-five Dollars currency or one Silver Dollar upwards.
Second—The interest allowed is six per cent. (6 p.%) per annum, which is liquidated every six months.
Third—The depositors can at any time retire the whole or part of the money deposited.
Fourth—Once the money deposited exceeds twenty-five thousand dollars currency, or one thousand dollars silver, the depositor, if he wishe can open an account current, according to the rules established by the Bank.
Fifth—In case the depositor loses his pass book, it can be replaced by another on paying twelve dollars currency, and advertising the loss in the public newspapers.

IMPERIAL PETROLEUM,
IN PATENT TIN CANS.
BRILLIANCY, ECONOMY, SAFETY!

The Undersigned beg to inform the Public that they have received direct from the Proprietors, Messrs. LANMAN & KEMP, NEW YORK, a shipment of the above Celebrated Petroleum Oil, which has established for itself a reputation for excellence surpassing all other Petroleums. The following are some of the qualities possessed by it:—
1st. By a great improvement in Refining, it is freed from the Gaseous Naptha, and will, therefore, stand a higher degree of heat than other Petroleums before Igniting, thus making it much safer; in fact, almost
NON-EXPLOSIVE!
2nd. It is pure white in colour, has scarcely any smell, and is clean and pleasant to handle.
3rd. It has a much greater density or heaviness of body than ordinary Petroleum—a large part of which latter passes off in Gas,—the Imperial Petroleum being Pure Oil will, therefore, with rare exception,
BURN 25 PER CENT. LONGER!
than other Petroleums
4th. The flame from the Imperial Petroleum is a pure white, while nearly all other Petroleums give a yellow opaque flame. On this account, two Lamps burning the Imperial Petroleum will give as much Light as THREE Lamps burning ordinary Petroleum.
5th. It burns clear and steady without flickering, which is a great relief and saving to the eyesight.
6th. It does not Crust in the Wick, and, therefore, requires Trimming but seldom.
7th. The Imperial Petroleum is shipped in Patent Tin Cans, not liable to leak, thus avoiding the loss so often entailed upon the buyer, and being from one vein of Oil, it is always uniform in colour and qualities.
We respectfully ask the attention of Families, Storekeepers, and those who have in charge the Lighting of Schools, Churches, Public Halls, and Street Lamps to this very superior Oil, which, from its SAFETY, ECONOMY, and BRILLIANCY, they will find admirably suited for their various purposes.
